PROBE RESOURCES LTD.
NOTES TO THE FINANCIAL STATEMENTS
for the nine months ended May 31, 2006

Note 1 Nature and Continuance of Operations

The company is in the development stage and is publicly traded on the TSX Venture Exchange. The company is in the process of exploring and evaluating its mineral property and has not yet determined whether this property contains ore reserves that are economically recoverable. The recoverability of amounts shown for the resource properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, confirmation of the company's interest in the underlying mineral claims, the ability of the company to obtain necessary financing to complete the development and upon future profitable production or proceeds from the disposition thereof.

These financial statements have been prepared on a going concern basis. The company has a working capital of \$369,831 as at May 31, 2006 and has accumulated losses of \$1,572,983 since inception. Its ability to continue as a going concern is dependent upon the ability of the company to generate profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due.

The company was incorporated under the Company Act of British Columbia.

Note 2 Significant Accounting Policies

The financial statements of the company have been prepared in accordance with generally accepted accounting principles. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements for a period necessarily involves the use of estimates which have been made using careful judgment. Actual results could differ from these estimates.

The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below:

Resource Properties and Deferred Exploration Costs

The acquisition of resource properties are recorded at cost. Exploration and development costs relating to these properties are deferred until the properties are brought into production, at which time the costs are amortized on the unit of production basis, or until the properties are abandoned or sold, at which time the costs are written off. Resource properties are abandoned when the claims are no longer in good standing or the agreements covering the claims are in default, and in either case management has determined that abandonment is appropriate.

By an agreement dated July 30, 1997, and amended September 25, 1997, the company was granted the option to earn a 100% undivided interest in the Larry Claim Group comprised of 24 claims located in the Greenwood Mining District, Province of British Columbia. In consideration of the option, the company agreed to pay \$10,000 (paid) and issue 50,000 common shares of the company (issued). The agreement is subject to a 2.5% royalty on net profits. The company has the option to acquire the net profits royalty for additional consideration of \$100,000.

50,000 common shares were issued at a deemed price of \$0.12 to complete the acquisition of the Larry Claim Group. The deemed price is based on the trading value of the Company's share at the time of the transaction.
